Frontend Engineer - Onboarding

Toronto, Ontario, Canada

Apply

BitGo is the leading infrastructure provider of digital asset solutions, delivering custody, wallets, staking, trading, financing, and settlement services from regulated cold storage. Since our founding in 2013, we have focused on enabling our clients to securely navigate the digital asset space. With a global presence and multiple Trust companies, BitGo serves thousands of institutions, including many of the industry's top brands, exchanges, and platforms, and millions of retail investors worldwide. As the operational backbone of the digital economy, BitGo handles a significant portion of Bitcoin network transactions and is the largest independent digital asset custodian, and staking provider, in the world. For more information, visit www.bitgo.com.

This role will require being full-time onsite at our Toronto office to support collaborative team dynamics and innovative problem-solving.

As a Frontend Engineer, you will be responsible for designing, developing, and maintaining UI and frontend components of our onboarding experience. You will work closely with product managers, designers, and other engineers to deliver high-quality, secure, and scalable solutions that meet the needs of our clients. This role requires a deep understanding of frontend technologies like React, CSS and HTML.

Responsibilities:

- Collaborate closely with design and product managers to plan and develop new UIs for upcoming initiatives
- Improve existing UI functionality on a variety of products

- Build reusable code for future use
- Codebase health improvements
- Cross team communications with stakeholders to understand implementation requirements and limitations
- Provide mentorship to peers in the broader engineering team through code reviews and education on best practices
- Provide maintenance support and enhance performance to existing applications

Skills & Experience:

We are looking for teammates who share and practice our values: open communication, transparency, taking ownership, and a high level of craftsmanship. We are looking for coworkers who share our vision and mission: deliver trust in digital assets.

Required

- 3+ years of proven experience of frontend and UI development
- Strong experience with React
- Advanced knowledge of JavaScript/TypeScript, CSS and HTML
- Experience working with modern JavaScript frameworks
- Experience working with design systems
- Experience with unit, Integration and end-to-end testing
- Proficiency in Git / GitHub, branching methodologies, code review tools, and CI/CD pipelines
- Ability to work independently in a fast-paced environment

Preferred

- Experience developing consumer-facing crypto products
- Ability to work full-stack and familiarity with Node.js and Express applications
- Experience working with clients and/or business partners
